

DRAFT

STAKEHOLDER WORKSHOP: BUILDING BRIDGES IN PERSONALISED MEDICINE BETWEEN LATIN AMERICA-CARIBBEAN AND EUROPE

11-12 December 2019

Venue: LATU Technological Park, Montevideo (URUGUAY)

Objectives of the workshop

- To present the work of the EULAC-PerMed project, mainly the results of the mapping of Personalised Medicine in LAC.
- To analyse and discuss with relevant actors from LAC the situation of Personalised Medicine in Latin America and the Caribbean, analyzing main gaps and barriers, opportunities and challenges ahead.
- To discuss the best options to promote the collaboration between LAC and EU in Personalised Medicine and how to best approach the science and policy dialogue to be carried out within the EULAC-PerMed project.

The workshop will bring together EULAC-PerMed partners, representatives of ICPerMed, European and LAC experts, policy makers, funders, researchers, industry and patient organizations to share knowledge, discuss options and provide recommendations towards building bridges in personalised medicine between Latin America, the Caribbean and Europe.

Organizers

- INNOVATEC – España
- Agencia Nacional de Investigación e Innovación – ANII – URUGUAY

The workshop is one of the activities carried out as part of the European project EULAC-PerMed¹, funded by the European Commission's Horizon 2020 Research and Innovation programme under Grant Agreement Num. 825173.

PROVISIONAL AGENDA
