

**EULAC PerMed 1st Summer School
7th - 8th November 2019, Madrid**

**“Personalised Medicine Research
in the Health System”**

Dr. Gaetano Guglielmi
Italian Ministry of Health

**Escuela Nacional de Sanidad” ISCIII
“Aula 9-10
7th November , Madrid 2019**

EULAC-PerMed has been funded by the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement (GA) No 825173

- “Summer School” events are under the responsibility of Italian Ministry of Health (WP4, task 4.1: Task leader) and the contribution of GORGAS (Panama), ANII (Uruguay) and the EULAC PerMed Consortium.
- The today course is aimed of acquiring knowledge and skills that will allow the participants to assess the impact of some aspects of the Personalised Medicine Research in Health system. It could be also a chance to create research networking between EU & LAC countries.
- The participation fee is free and forty participants from EU and Latin American and Caribbean (LAC) countries are been accepted.
- EULAC-PerMed consortium has awarded a scholarship to 6 participants on a competitive basis and with a geographic balance

EULAC-PerMed has been funded by the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement (GA) No 825173

- During every talk, the speaker presents some gaps or questions to the applicants.
- After that, the participants will be divided in two groups, to try to find the more suitable lines of research to answer the issues indicated.
- Finally, after the discussion, participants will present their conclusions on around 5 minutes.
- Final Test: it will take place during the last session and includes a written multiple-choice final exam and an open question.

EULAC-PerMed has been funded by the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement (GA) No 825173

- The agenda starts with an “Overview/Stat of Art of Personalize Medicine in the Health System. Perspective EU & LAC countries” by Prof Iscia Lopes-Cendes from Brasil and the Introduction to the definition of Personalise Medicine by Dr Indridi Benediktsson from the EC.
 - After a overview of the Research to support Sustainability and Collaboration between Health care players by Prof. Stefania Boccia from Italy
 - The next session will focused in Oncology by prof Giovanni Martinelli from Italy
- Research on telehealth and e-health applications by Dr. Sofoklis Kyriazakos from Greece.

EULAC-PerMed has been funded by the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement (GA) No 825173

- The second day starts with the vision of Prof Capobiano from Miami regarding Research to support innovative decision tools for health care providers in Personalized Medicine.
- A brief introduction to ERAPerMed call 2020 by Dr. Mauricio Franco (ISCIII) and the ICPerMed Recognition Best Practice call 2020 by Dr, M. Jose Ruiz (It-MoH)
The last but not least part , will review the stat-of-the-art on Rare Disease and Personalise Medicine by Prof Joao Lavinha from Portugal and an example of LAC-EU collaboration: Current genetic testing practice in Lynch Syndrome in Latin America by Dr. Mev Dominguez Valentin from Norway.
