

# Project Overview

**EULAC**  
**PerMed**

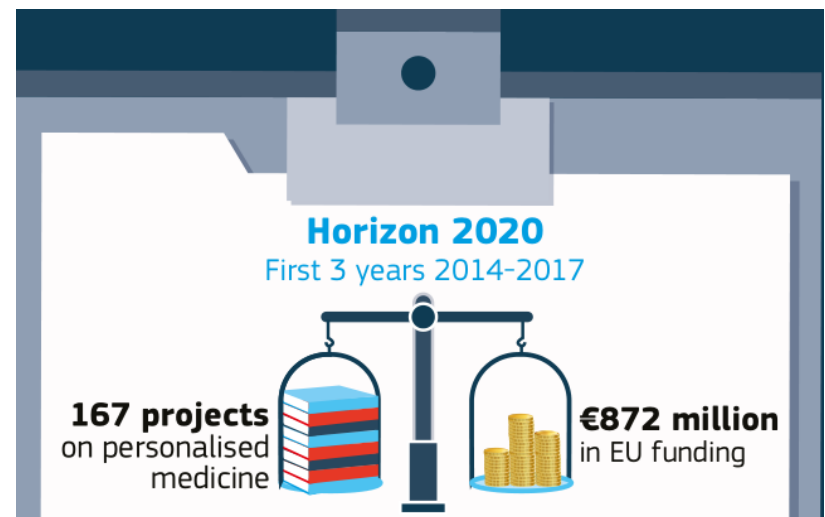

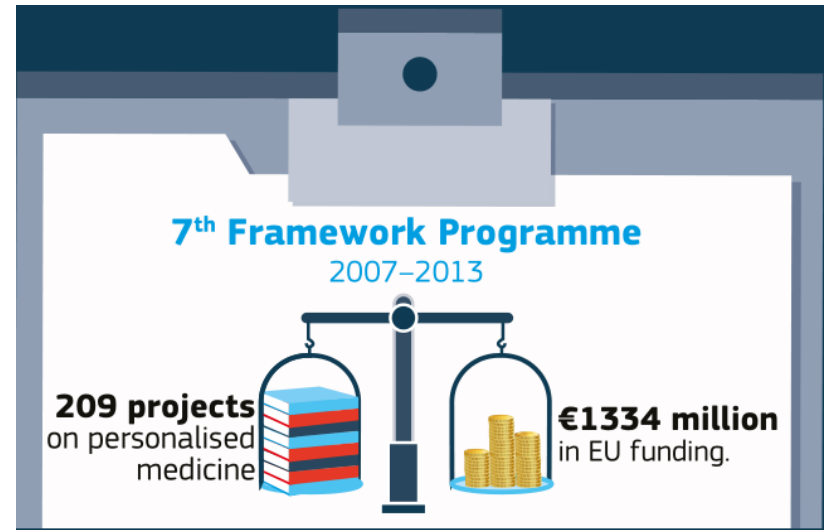

Esther Rodríguez, PhD  
*Head of European Project Office*  
*Instituto de Salud Carlos III*

Montevideo, December 2019

Research on **Personalized Medicine** (PerMed) is a top priority for the European Union (EU) as a strategy aimed at delivering personalised health and care solutions to benefit citizens.

# Investment & Alignment

- [Council conclusions on personalised medicine for patients](#), published in December 2015.
- International Consortium for Personalized Medicine (ICPerMed) since Nov. 2016
- ERANET for Personalized Medicine since Dec. 2017
- + several Coordination & Support Actions

# EULAC PerMed

In order to strengthen the global efforts on Personalized Medicine and the cooperation of **Europe (EU) with Latin American and Caribbean (LAC) countries**, the **EULAC PerMed** project, funded by the Horizon 2020 Programme of the European Commission, has been launched in January 2019

EULAC PerMed has the ambition to engage LAC countries in the **International Consortium on Personalized Medicine (ICPerMed)** and in the ERANet **ERAPerMed** with the aim at advancing in the implementation of the Action Plan of ICPerMed.

# SPECIFIC OBJECTIVES

- EULAC PerMed will be the vehicle for:
  - Mapping existing programmes, capacities and expertise and gaps in CELAC countries. (WP2)
  - Facilitating the incorporation of LAC countries in ICPeMed and in the ERAPerMed. (WP3)
  - Fostering the participation of LAC countries in research mobility and transnational projects on PerMed, and a platform for EU-LAC collaboration on clinical trials PerMed focused. (WP4)
  - Cross-border learning from Research and Innovation and the ethical, legal and social aspects for implementing innovations between research capacities based in EU and LAC. (WP5)
