

TECHNICAL TASK FORCE

The EULAC PerMed Technical Task Force brings together key partners from the EU and LAC regions. Its mission is to organize the Technical Workshops on Personalised Medicine (PM) research methods and technologies. The Task Force will strive to organize high quality workshops, managing the content and logistics, and ensuring bi-regional representation of speakers and participants, providing a platform for networking amongst research teams. It will also produce and publish reports on the workshops, highlighting opportunities for enhanced EU – LAC collaboration in the field of Personalised Medicine.

ECRIN The European Clinical Research Infrastructure Network is a not-for-profit intergovernmental organisation that supports the conduct of multinational clinical trials in Europe. It supports a portfolio of over 60 trials and participates in international collaboration projects across the globe. As leader of the Technical Task Force, ECRIN brings forth the expertise on multinational clinical research and a rich network of experts working in PM research across Europe.

DLR The Project Management Agency (PT-DLR) of the DLR (German Aerospace Center) supports a wide range of ground-breaking research and innovation projects across the EU and across the globe. As part of the ICPeMed Secretariat, the DLR provides strategic insight to the Technical Task Force, helping to identifying key topics and experts for the Technical Workshops.

FIOCRUZ The Fundação Oswaldo Cruz is Brazil's main biomedical and public health research institution. Spread through 10 states, and divided in 16 scientific and technical units, FIOCRUZ carries out cutting-edge research in diverse fields, including PM. As co-leader of the Technical Task Force, FIOCRUZ contributes with its vast network of LAC-LAC collaborations and the perspective of a LAC research institution.

PerMed**

INNOVATEC An independent Spanish firm, specialized in science, technology and innovation, Innovatec has solid experience in international research collaboration projects across the globe. As leader of stakeholder mapping and liaising activities, Innovatec contributes within the Task Force to identifying topics of broad relevance to all key stakeholders.

ISCIH The Instituto de Salud Carlos III is the Spanish Public Health Research Institute. Its mission is to contribute to improving the health of all citizens and to fight diseases through the promotion of research and innovation in Health Sciences and Biomedicine. As coordinator of the EULAC PerMed project, ISCIH provides a strategic vision for the Task Force and ensures the work of the Task Force will contribute to achieving the overall goals of the project.

ITMoH The Italian Ministry of Health is the national health authority and collaborates in numerous international research collaborations. As the leader of the Action Group 2 and Facilitator of Challenge 5 of the ICPeMed, the ITMoH ensures that the topics and focus of the Technical Workshops align with overarching objectives of the ICPeMed.

GORGAS The Instituto Conmemorativo Gorgas de Estudios de la Salud (ICGES) in Panama, is a leading biomedical and public health research institute. Not only does it perform clinical research, it also provides clinical care and manages the National Reference Laboratory for Public Health. GORGAS brings its expertise on LAC-LAC and international collaborations to the Technical Task Force.
